World Health Organisation – Rolling Updates

Updated guidance on maintaining essential services

1 June 2020

This guidance recommends practical actions that countries can take at national, subregional and local levels to reorganize and safely maintain access to high-quality, essential health services in the pandemic context.

It also outlines sample indicators for monitoring essential health services, and describes considerations on when to stop and restart services as COVID-19 transmission recedes and surges.

[Maintaining essential health services: operational guidance for the COVID-19 context](#)

WHO issues new illustrated guide on psychosocial skills for COVID-19 responders

1 June 2020

[Back to top](#)

Aimed at those on the frontlines of the COVID-19 response – from food store staff to employers to emergency responders – WHO has released illustrated advice for taking care of one’s own mental well-being, communicating with empathy, and helping people suffering from stress or severe distress.

The Guide was developed by the Inter-Agency Standing Committee’s Mental Health and Psychosocial Support Reference Group, a collaboration of UN agencies, national and international NGOs and international agencies.
